Protecting Health & the Environment

Open House Public Meeting

The Navy Environmental Health Center advocates the **Open House** or **Public Availability Session** as the most effective format for informing the public on environmental or health and safety risks.

The Environmental Programs Directorate Navy Environmental Health Center produces Community Outreach Posters to assist Navy and Marine Corps installations in hosting Open House Public Meetings.

Essentially, an **Open House** is a poster exhibit, typically comprised of four to six displays. The displays each highlight one topic.

Chemical specific and **topic or process specific** posters are available. **Site specific** posters can be developed upon request.

Community Outreach Posters contain three panels and are available in 8.5" x 11" and 16.5" x 32".
